

Attention Visitors

As a safety precaution, visitor restrictions are in place.

Patient safety is our top priority. These restrictions are necessary to reduce potential exposure to viruses and respiratory illnesses and to support the safety of our patients and caregivers.

- Please limit the number of visitors (two visitors per patient) and frequency of visits to patients at the hospital*.
- All visitors must be at least 18 years of age or older (except in the ED where visitors must be 12 or older)*.
- This restriction applies to all units, including maternity, the NICU, and Intensive Care Unit (ICU). *Note: in the NICU, only parents are permitted at this time.*
- Community meetings inside the hospital may be postponed. If this is the case, the meeting organizer will inform participants.
- If you have cold or flu-like symptoms, consider alternative communication methods (such as phone or video calls), and wait to visit your loved one until you are well.

****Exceptions will be made on a case-by-case basis.***
