

COMMUNITY BENEFIT SNAPSHOT

We invest in our communities' health

To achieve our vision of health for a better world, we worked closely with our community partners to ensure we addressed the communities' most pressing needs.

Bringing our Mission to life

At Providence, we invest in improving community health across all seven states we serve. Called by our Mission, we are committed to serving all within our communities, especially the poor and vulnerable.

Community health improvement and strategic partnerships

\$132 MILLION

Health professions education and research

\$137 MILLION

Subsidized health services

\$86 MILLION

Free and discounted care for the uninsured and underinsured

\$276 MILLION

Unpaid cost of Medicaid and other means-tested government programs

\$1.084 BILLION

*Data are consolidated based on unaudited financial reporting.

The numbers include home and community care investments and joint ventures by percentage ownership.

Our shared values in action

We are dedicated to your community

Over the past year, our communities have faced extraordinary challenges. But even during the most difficult public health crisis of our time, communities have also shown remarkable strength and resolve. There is so much good that can be accomplished at the community level, especially when like-minded organizations work together. In service to our Mission, Providence partners with community-based organizations to identify urgent health needs and environmental factors that are impacting the well-being of our communities. We act to provide short-term solutions and envision long-term results by wisely investing in our communities to help build a more equitable and sustainable future.

In 2020, we invested \$1.7 billion in community benefit across seven regions, to support organizations, programs and initiatives that create lasting change at the community level. These efforts seek to mitigate immediate challenges while finding solutions to deep-rooted problems, improve access to health care, and advance innovative care models to meet the evolving needs of our communities.

“The work done in our communities is fundamental to our organization’s Mission and a demonstration of our values of compassion, integrity, and justice in practice. We also know that to be effective, this work must be done in collaboration and solidarity with communities themselves. As we continue to serve under-resourced populations and advance health equity and social justice in our communities, Providence remains steadfast in our pursuit of health for a better world.”
