$89.8 MILLION

*Data is consolidated based on unaudited financial reporting.
*These numbers include home and community care investments.

ADDRESSING HEALTH CHALLENGES IN OUR COMMUNITY

Our community health needs assessment guides our investments and partnerships. In 2019, we focused on providing comprehensive behavioral health services, increasing access to health services, and addressing social determinants of health and well-being, including family violence, housing and food insecurity.

BRINGING OUR MISSION TO LIFE

At Providence, we invest in improving community health across all seven states we serve. Called by our Mission, we are committed to serving all within our communities, especially the poor and vulnerable.
Sue visited her doctor because of recurring headaches, wheezing and hives. During the exam, she told her doctor about a leaky roof and mold in her apartment and a landlord unwilling to resolve the issues. As part of her treatment, she left her doctor’s office with a prescription for an attorney.

Providence has an innovative medical-legal partnership where health providers at the Spokane Teaching Health Clinic and Providence House of Charity Clinic may prescribe an attorney to their low-income patients if they determine legal intervention would help address or resolve a patient’s health issue.

With this unique partnership, providers can address the nonmedical root causes of health issues. And because, in Sue’s case, the mold is gone and her roof no longer leaks, her condition improves. She feels better and saves on the cost of future doctor’s visits and medications.
