EXECUTIVE SUMMARY

Kadlec Regional Medical Center, hereafter referred to as Kadlec, is a not-for-profit health care system serving residents in Southeast Washington and Northeast Oregon. Founded in 1944, Kadlec has a rich heritage of offering vital health services to everyone who needs care, regardless of their ability to pay. When Kadlec opened its doors in 1944, the hospital was established to care for the Hanford area workers and their families. Since then Kadlec has grown to a regional medical center providing care for people throughout the Mid-Columbia. Kadlec has grown into a regional referral center providing primary and specialty care services for patients of all ages.

Today more than 3,600 employees work at Kadlec in the hospital, the free-standing Emergency Department, and in primary and specialty care clinics throughout the region. Kadlec is part of the family of mission-driven organizations that make up Providence St. Joseph Health, serving communities across a seven-state footprint. In 2019, Kadlec provided over $68 million in community benefit1 in response to unmet needs and to improve the health and well-being of those we serve in Benton and Franklin Counties and beyond.

Collaborating Organizations

Kadlec collaborates with the public health department known as Benton-Franklin Health District (BFHD) and the Benton-Franklin Community Health Alliance (BFCHA) to conduct the Community Health Needs Assessment (CHNA) and the Community Health Improvement Plan (CHIP) every three years. In 2019, the CHNA steering committee included representatives from Trios Health, Lourdes Health, and Prosser Memorial Health. The CHIP steering committee also includes representatives from Tri-Cities Community Health and Educational Service District (ESD) 123.

1 A community benefit is an initiative, program or activity that provides treatment or promotes health and healing as a response to identified community needs and meets at least one of the following community benefit objectives: a. Improves access to health services; b. Enhances public health; c. Advances increased general knowledge; and/or d. Relieves government burden to improve health. Note: Community benefit includes both services to the economically poor and broader community. To be reported as a community benefit initiative or program, community need must be demonstrated. Community need can be demonstrated through the following: 1) community health needs assessment developed by the ministry or in partnership with other community organizations; 2) documentation that demonstrates community need and/or a request from a public agency or community group was the basis for initiating or continuing the activity or program; 3) or the involvement of unrelated, collaborative tax-exempt or government organizations as partners in the community benefit initiative or program.
Kadlec Community Health Improvement Plan Priorities

As a result of the findings of our 2019 CHNA and through a prioritization process aligned with our Mission, resources, and hospital strategic plan, Kadlec will focus on the following areas for its 2020 - 2022 Community Benefit efforts:

PRIORITY 1: BEHAVIORAL HEALTH CHALLENGES

Behavioral health challenges include mental health, suicide, and substance use disorders. Groups identified as being especially affected are people experiencing homelessness, youth, older adults, veterans, and those who identify as LGBTQ.

PRIORITY 2: ACCESS AND COST OF HEALTH CARE

Access and cost of health care includes access to behavioral health care and medical health care as well as the ability to pay for care. While insurance enrollment rates have increased due to systemic changes at the federal level, the cost of health care remains a financial burden for many in our community.

PRIORITY 3: SOCIAL DETERMINANTS OF HEALTH

Social determinants of health are conditions in the places where people live, work, and play that affect a wide range of health risks and outcomes. Significant health-related areas identified include poverty, housing and homelessness, and food insecurity.

In addition to the three priorities identified through the 2019 collaborative CHNA process, Kadlec identified a fourth priority area.

PRIORITY 4: OBESITY/MAINTAINING HEALTHY WEIGHT

While obesity was not identified as a priority in the 2019 CHNA, obesity rates for children, teens, and adults in Benton and Franklin Counties continue to increase and remain higher than Washington State rates. According to the Center for Disease Control (CDC), “Childhood obesity is a serious problem in the United States putting children and adolescents at risk for poor health. Obesity-related conditions include heart disease, stroke, type 2 diabetes, and certain types of cancer that are some of the leading causes of preventable, premature death.” Kadlec is committed to the long-term goal of reducing obesity, and it will continue to be addressed in the 2020 Kadlec CHIP.

Responding to the COVID-19 Pandemic

In addition to the aforementioned priority areas, the 2020 community health improvement process was disrupted by the SARS-CoV-2 virus and COVID-19, which has impacted all of our communities. While we have focused on crisis response, it has required a significant re-direction of resources and reduced community engagement in the CHIP process.
This CHIP is currently designed to address the needs identified and prioritized through the 2019 CHNA, though COVID-19 will have substantial impacts on our community needs. These impacts are likely to exacerbate some of the needs identified, and cause others to rise in level of priority. While this is a dynamic situation, we recognize the greatest needs of our community will change in the coming months, and it is important that we adapt our efforts to respond accordingly. This CHIP will be updated by March 2021 to better document the impact of and our response to COVID-19 in our community. We are committed to supporting, strengthening, and serving our community in ways that align with our Mission, engage our expertise, and leverage our Community Benefit dollars in the most impactful ways.

INTRODUCTION

Who We Are

Kadlec Regional Medical Center is an acute-care hospital founded in 1944 and located in Richland, Washington. There are currently 300 licensed beds. While we have the ability to utilize all 300 beds, we are not staffed for that many at this time. In January of 2021, Kadlec will have 337 licensed beds. Kadlec Regional Medical Center is approximately eleven acres in size. Kadlec has a staff of more than 3600 and professional relationships with more than 450 local physicians. Major programs and services offered to the community include:

- Comprehensive cardiac care
- Neurosurgery and neurology
- Neonatal and pediatrics
- Rural and emergency medicine
- Telehealth services in partnership with clinics and hospitals in Southeast Washington and Northeast Oregon

Our Commitment to Community

Kadlec is a not-for-profit hospital that dedicates resources to improve the health and quality of life for the communities it serves, with special emphasis on the needs of the economically poor and vulnerable. During 2019, Kadlec provided over $68 million in community benefit in response to unmet needs and to improve the health and well-being of those we serve in Benton and Franklin Counties and beyond. Our region includes two for-profit hospitals: Trios Health and Lourdes Health; two critical access hospitals: Lourdes Health and Prosser Memorial Health; and three Federally Qualified Health Centers (FQHC): Tri-City Community Health, Yakima Farm Workers Clinics, and Columbia Basin Health Association.

---

2 A community benefit is an initiative, program or activity that provides treatment or promotes health and healing as a response to identified community needs and meets at least one of the following community benefit objectives: a. Improves access to health services; b. Enhances public health; c. Advances increased general knowledge; and/or d. Relieves government burden to improve health. Note: Community benefit includes both services to the economically poor and broader community. To be reported as a community benefit initiative or program, community need must be demonstrated. Community need can be demonstrated through the following: 1) community health needs assessment developed by the ministry or in partnership with other community organizations; 2) documentation that demonstrates community need and/or a request from a public agency or community group was the basis for initiating or continuing the activity or program; 3) or the involvement of unrelated, collaborative tax-exempt or government organizations as partners in the community benefit initiative or program.
Community Benefit Governance and Management Structure

Kadlec further demonstrates organizational commitment to the community benefit process through the allocation of staff time, financial resources, and participation and collaboration with community partners. The Community Health Investment Manager is responsible for coordinating the implementation of State and Federal 501r requirements as well as providing the opportunity for community leaders and internal hospital Executive Management Team members, physicians and other staff to work together in planning and implementing the CHIP.

Kadlec worked closely with the Benton-Franklin Health District and Benton-Franklin Community Health Alliance and sub-committees throughout the community health improvement planning process to ensure that our goals and strategies are aligned and addressing the priority needs identified in the CHNA. Kadlec’s CEO, Executive Team and Board were engaged in the process and approved the 2019 CHNA and Kadlec Executive Summary.

A charter approved in 2019 establishes the Kadlec Community Mission Board. The role of the Kadlec Community Mission Board is to support the Board of Trustees in overseeing community benefit issues. The Community Mission Board acts in accordance with the Board-approved charter. The Community Mission Board is charged with developing policies and programs that address identified needs in the service area particularly for underserved populations, overseeing development and implementation of the CHNA and CHIP reports, and overseeing and directing the Community Benefit activities. The Community Mission Board shall be comprised of 8-15 board members who are not only professionally diverse, but who closely represent the age, gender, race and ethnic profile of the service area. A majority of members have knowledge and experience with the populations most likely to have disproportionate unmet health needs. The Kadlec Community Mission Board generally meets bi-monthly.

Planning for the Uninsured and Underinsured

Our mission is to provide quality care to all our patients, regardless of ability to pay. We believe that no one should delay seeking necessary medical care because they lack health insurance. That is why Kadlec has a Financial Assistance Program (FAP) that provides free or discounted services to eligible patients.

One way Kadlec informs the public of its FAP is by posting notices. Notices are posted in high volume inpatient and outpatient service areas. Notices are also posted at locations where a patient may pay their bill. Notices include contact information on how a patient can obtain more information on financial assistance as well as where to apply for assistance. These notices are posted in English and Spanish and any other languages that are representative of 5% or greater of patients in the hospital’s service area. All patients who demonstrate lack of financial coverage by third party insurers are offered an opportunity to complete the Patient Financial Assistance Application and are offered information, assistance, and referral as appropriate to government sponsored programs for which they may be eligible.
Billing statements and letters advise patients of the FAP and direct them to the Kadlec website to obtain an application and/or contact our billing office. The Financial Assistance Program application and policy are available in six languages on the Kadlec website.

OUR COMMUNITY

Description of Community Served

Benton and Franklin Counties, located in South Eastern Washington, have a total population of approximately 290,000 people. Each of the three main municipalities that make up the Tri-Cities are located within one of these two counties: Kennewick and Richland within Benton County and Pasco within Franklin County. There are numerous other smaller cities located within this jurisdiction including Prosser, Connell, Eltopia, Benton City, West Richland, Finley, Mesa, Basin City and Kahlotus.

The population estimates for the cities and towns within Benton and Franklin Counties in 2019:

- Benton City: 3,520
- Connell: 5,500
- Kahlotus: 165
- Kennewick: 83,670
- Mesa: 495
- Pasco: 75,290
- Prosser: 6,145
- Richland: 56,850
- West Richland: 15,340

Given these numbers, the estimated population of residents living in unincorporated areas in either county (ex: Finley, Eltopia, Basin City) is 43,000 people.

While the population remains predominantly white, there is a substantial Hispanic/Latinx population that has more than doubled over the past two decades. Approximately 41,000 people living in the bi-county region are foreign born, regardless of citizenship status, and 30% of households report English is not the primary language spoken in the home.

Community Health Assessment Tool (CHAT)

The map on the next page illustrates the approximate hospital service area of the four local healthcare systems in the region: Kadlec Regional Medical Center (Kadlec), Trios Health (Trios), Lourdes Health (Lourdes), and Prosser Memorial Health (PMH).

The bi-county region is also considered to be a health care provider shortage area for primary care providers, mental health providers, and dental providers, meaning there are not enough providers for the population size, geographic location, or facility type. Franklin County is also considered to be a medically underserved area which the federal government classifies as an area that has too few primary care providers, high infant mortality, high poverty, or a high elderly population. These definitions and more information can be found on the website for the Health Resources & Services Administration (HRSA).
Figure 1. Kadlec Primary and Secondary Service Areas
COMMUNITY NEEDS AND ASSETS ASSESSMENT
PROCESS AND RESULTS

Summary of Community Needs Assessment Process and Results

The Community Health Needs Assessment was conducted as a collaboration between Kadlec Regional Medical Center, the Benton-Franklin Health District (BFHD) and the Benton-Franklin Community Health Alliance (BFCHA). The collaboration also included representatives from Trios Health, Lourdes Health, and Prosser Memorial Health.

The steering committee was formed in March 2019 and began meeting weekly shortly thereafter. BFHD’s Health Officer participated in the development of the CHNA in 2013 and the update in 2016. A modified version of the Mobilizing for Action through Planning and Partnerships (MAPP) strategic planning model promoted by the National Association of County and City Health Officials (NACCHO) was used.

The steering committee identified a list of quantitative health-related data points based on the 2013 and 2016 CHNA data books, the stakeholder survey, and priority issues highlighted by community members and stakeholders. These data points make up the Local Health Status Indicators. The Performance Management team from the BFHD then compiled the list of desired data points and determined which ones could be supported by a reliable source. Sources used during this process included the Healthy Youth Survey (HYS), Behavioral Risk Factor Surveillance System (BRFSS), Community Health Assessment Tool (CHAT), Office the Superintendent of Public Instruction (OSPI), Department of Education, American Community Survey (ACS), and partner-collected data from the local health care systems and community organizations. Based on these sources, the BFHD epidemiologist compiled the most current data for 120 individual data points into a 2019 Data Workbook for the steering committee’s review and consideration.

Qualitative data was gathered in an attempt to gain insightful and equitable community input. This took a significant amount of time and effort in the form of listening sessions with members of priority populations and stakeholder interviews and surveys with those who serve these populations. Based on feedback from the Public Health Officer who participated in the CHNA process in 2016, the steering committee identified community input and involvement as an area of opportunity for improvement. Steering committee members wanted to be more intentional about incorporating health equity into this engagement process. One way in which this was accomplished was by utilizing existing tools, like the 2018 Health Disparities Report published by BFHD. This report helped to inform the ultimate decisions on which priority population groups would be a primary focus for the listening sessions, specifically highlighting the Hispanic/Latinx and the LGBTQ communities. Another way the committee sought to be more inclusive was to offer multiple listening sessions in Spanish, the other predominant language in Benton and Franklin Counties besides English. A facilitator provided by Providence St. Joseph Health (PSJH) conducted three of the ten listening session completely in Spanish with Spanish-speaking note takers at all of them. Finally, the steering committee worked diligently to ensure a wide variety of sectors and populations were represented in the 16 stakeholder interviews including representation...
from the following population and sector categories: behavioral health, homelessness, health care, seniors, Hispanic/Latinx people, domestic and sexual violence, first responders, substance abuse, pre-K-12th grade education, post-secondary education, LGBTQ identifying people, refugees, and persons living with a disability. The sessions were typically recorded with participant permission, and one or two note takers captured participant responses.

In an effort to include input from as many community partners as possible, the steering committee opted to disseminate the stakeholder survey from the stakeholder interview packet. An electronic copy was distributed via email distribution lists from BFHD, hospital partners, and BFCHA. Paper surveys were also completed by members of 20 coalitions, boards, and community partner agencies. Over 200 survey responses were received, analyzed and included in the community input data.

**Identification and Selection of Significant Health Needs**

The CHNA steering committee recognizes the value in having community members and community stakeholders participate in the CHNA process and share their perspectives. As the people who live and work in the counties, they have first-hand knowledge of the needs and strengths of their community. To gather community input, listening sessions were conducted with community members and community stakeholders were interviewed and surveyed.

Ten listening sessions were completed with a total of 96 community members. Participants shared their vision for a healthy community, the health-related needs of the community, and the assets that currently help the community be healthy.

Surveys were completed by 256 stakeholders. They were asked to identify their top five health-related community needs. Stakeholders prioritized one health-related need substantially above the others: behavioral health challenges, including mental health and substance use disorder. Two additional needs were given high priority and tied for importance: access to behavioral health services and homelessness/housing instability. These top three needs mirror those of the stakeholders who were interviewed.

The steering committee completed 16 community stakeholder interviews, including 40 stakeholders who are people invested in the well-being of the community with first-hand knowledge of community needs and strengths. Stakeholders were asked to rank unmet health-related community needs. For those needs, stakeholders shared which populations are most affected, gaps in community services to address the needs, and barriers to services.

**Community Health Needs Prioritized**

The collaborative partners identified the following three priority health needs:

**PRIORITY 1: BEHAVIORAL HEALTH CHALLENGES**

Behavioral health challenges include mental health, suicide, and substance use disorders. Groups identified as being especially affected are people experiencing homelessness, youth, older adults, veterans, and those who identify as LGBTQ.
PRIORITY 2: ACCESS AND COST OF ALL HEALTH CARE

Access and cost of all health care includes access to behavioral health care and medical health care as well as the ability to pay for care. While insurance enrollment rates have increased due to systemic changes at the federal level, the cost of health care remains a financial burden for many in our community.

PRIORITY 3: SOCIAL DETERMINANTS OF HEALTH

Social determinants of health are conditions in the places where people live, work, and play that affect a wide range of health risks and outcomes. Significant health-related areas identified include poverty, housing and homelessness, and food insecurity. Kadlec will focus SDOH efforts on addressing housing instability and homelessness.

In addition to the three priorities identified through the 2019 collaborative CHNA process, Kadlec identified a fourth priority area.

PRIORITY 4: OBESITY/MAINTAINING HEALTHY WEIGHT

While obesity was not identified as a priority in the 2019 collaborative CHNA, obesity rates for children, teens, and adults in Benton and Franklin Counties continue to increase and remain higher than Washington State rates. According to the Center for Disease Control (CDC), “Childhood obesity is a serious problem in the United States putting children and adolescents at risk for poor health. Obesity-related conditions include heart disease, stroke, type 2 diabetes, and certain types of cancer that are some of the leading causes of preventable, premature death.” Kadlec is committed to the long-term goal of reducing obesity, and it will continue to be addressed in the 2020 Kadlec CHIP.

Needs Beyond the Hospital’s Service Program

No hospital facility can address all of the health needs present in its community, and some needs identified in the CHNA are the mission of other organizations. For example, addressing food insecurity is the mission of Second Harvest, the Community Action Coalition, and local food banks.

While addressing food insecurity is not a direct focus of this CHIP, food insecurity is addressed in several ways. Kadlec organizes an annual food drive to provide food for those in need. Kadlec’s Project Homecoming program addresses the nutritional needs of patients when they are discharged through a partnership with Meals on Wheels if they were diagnosed with malnutrition while in our care.

While poverty will not be the direct focus of CHIP strategies outlined for 2020-2022, Kadlec’s Financial Aid Program (FAP) provides free or discounted services to eligible patients. Poverty and food insecurity will also be impacted through the housing instability and homelessness initiative.

During the COVID-19 pandemic, Kadlec is working with community organizations such as Communities in Schools to provide meals for students and families in need, and exploring ways to partner with Master Gardeners to help low-income, food-challenged families start growing their own produce.
Summary of Community Health Improvement Planning Process

The prioritization process included evaluating Local Health Status Indicators, considering change over time, comparison to target numbers outlined by Healthy People 2020, and the severity of the difference between state and local numbers. Approximately 70 data points were categorized into nine topic areas: obesity, physical health, mental health and suicide, substance abuse, homelessness and poverty, aging issues, community violence and safety, access to health care, and sexual and reproductive health.

A community partner compression prioritization session was held with over 50 representatives from community partners and agencies. Participants included representation from health care networks, local clinics, public health, first responders, behavioral health, long-term care facilities, local chambers of commerce, student nursing programs, and other service-oriented community-based organizations. The prioritization process included group discussion and reporting out which resulted in seven priority health issues: obesity, youth sexual and reproductive health, violence and community safety, social determinants of health, behavioral health challenges, access and cost of all health care, and aging and long-term care issues. Participants then selected their top three issues which resulted in three issues being clearly identified as the top three priority issues:

1. Behavioral health challenges
2. Access and cost of all health care
3. Social determinants of health

Kadlec has also independently prioritized a fourth issue: Obesity/Maintaining Healthy Weight.

Kadlec anticipates that improvement plan strategies may change and therefore, a flexible approach is best suited for the development of its response to the CHNA. For example, certain community health needs may become more pronounced and require changes to the initiatives identified by Kadlec in the enclosed CHIP.

Addressing the Needs of the Community: 2020-2022 Key Community Benefit Initiatives and Evaluation Plan

PRIORITY #1: BEHAVIORAL HEALTH CHALLENGES

Community Need Addressed

Behavioral health challenges include mental health, suicide and substance use disorder.

Goals (Anticipated Impact)

Reduction in the suicide rate and improved community substance use disorder treatment services.

Scope (Target Population)

Older adults and youth.

** Explore partnership opportunities to provide mental health and suicide prevention education to the Hispanic/Latinx community.
Related Activities and Tactics

In addition to the strategies noted here, Kadlec will explore Providence’s Community Resource Desk model to link vulnerable patients to social service agencies; implement a positive messaging campaign to reduce stigma related to mental health; continue support groups and educational programs to provide information and connection to those living with chronic illness and for family caregivers; continue Healthy Ages Wellness Programs to educate and reduce social isolation; explore opportunities to implement Nurse-Family Partnership program; and stand up a task force to determine whether to implement Naloxone dispensing program in hospital ED.

**PRIORITY #2: ACCESS AND COST OF HEALTH CARE**

*Community Need Addressed*

Access to health care includes behavioral health and medical care access, provider to population ratios resulting in extended wait times to see a provider, and access to providers with specialization in the unique needs of populations, such as people who identify as LGBTQ or adults living with disabilities.

*Goal (Anticipated Impact)*

Primary care and mental health provider to population ratios have improved which has resulted in reduced wait times to see providers. Patients are being connected with community services and resources.

*Scope (Target Population)*

People experiencing homelessness, youth, older adults, veterans, those who identify as LGBTQ, individuals experiencing Substance Use Disorder (SUD), and individuals whose primary language is Spanish.

*While Medicare education impacts access and cost of care, it often reduces stress for seniors making critical decisions impacting their medical and financial health.

**Related Activities and Tactics**

In addition to the strategies noted here, Kadlec will explore Providence’s Community Resource Desk model to link vulnerable patients to social service agencies.

**Resource Commitment**

Staff time, grants, and other resources to be determined in the 2020-2022 cycle
Key Community Partners

Lourdes Health, Trios Health, Tri-Cities Community Health, Yakima Farm Workers Clinic, Tri-City Regional Chamber of Commerce, Tri-Cities Washington Economic Development Council (TRIDEC)

PRIORITY #3: SOCIAL DETERMINANTS OF HEALTH

Community Need Addressed: Housing instability and homelessness

By focusing on housing instability and homelessness we anticipate indirect impacts on poverty and food insecurity as well.

Goal (Anticipated Impact)

The goal is to end homelessness by reaching functional zero, which means that the system will not have more individuals enter than exit from the homelessness system at any given time.

Scope (Target Population)

People experiencing homelessness, particularly those with unstable housing, youth, older adults, veterans, those who identify as LGBTQ, and individuals experiencing SUD.

**Related Activities and Tactics**

In addition to the strategies noted here, Kadlec will explore Providence’s Community Resource Desk model to link vulnerable patients to social service agencies; opportunities to make referrals for housing assistance and promote access to low-barrier housing in the community. These goals will be further refined and updated following the community housing workshop.

PRIORITY #4: OBESITY/MAINTAINING HEALTHY WEIGHT

Community Need Addressed

Obesity rates for children, teens and adults in Benton and Franklin Counties continue to increase and remain higher than Washington state rates.

Goal (Anticipated Impact)

The long-term goal is to reduce obesity rates in children and adults in Benton and Franklin Counties.

Scope (Target Population)

Children and families, particularly low-income families.

\(^3\) Per § 1.501(r)-3 IRS Requirements, posted on hospital website
Appendix 1: Definition of Terms

Community Benefit: An initiative, program or activity that provides treatment or promotes health and healing as a response to identified community needs and meets at least one of the following community benefit objectives:

a. Improves access to health services;
b. Enhances public health;
c. Advances increased general knowledge; and/or
d. Relieves government burden to improve health.

Community benefit includes services to persons living in poverty, persons who are vulnerable, and the broader community.

To be reported as a community benefit initiative or program, community need must be demonstrated. Community need can be demonstrated through the following:

a. Community health needs assessment developed by the ministry or in partnership with other community organizations;
b. Documentation that demonstrates community need and/or a request from a public agency or community group was the basis for initiating or continuing the activity or program; or
c. The involvement of unrelated, collaborative tax-exempt or government organizations as partners in the community benefit initiative or program.

Health Equity: Healthy People 2020 defines health equity as the “attainment of the highest level of health for all people. Achieving health equity requires valuing everyone equally with focused and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health and health care disparities.”

Social Determinants of Health: Powerful, complex relationships exist between health and biology, genetics, and individual behavior, and between health and health services, socioeconomic status, the physical environment, discrimination, racism, literacy levels, and legislative policies. These factors, which influence an individual’s or population’s health, are known as determinants of health. Social determinants of health are conditions in the environment in which people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.
**Initiative:** An initiative is an umbrella category under which a ministry organizes its key priority efforts. Each effort should be entered as a program in CBISA Online (Lyon Software). Please be sure to report on all your Key Community Benefit initiatives. If a ministry reports at the initiative level, the goal (anticipated impact), outcome measure, strategy and strategy measure are reported at the initiative level. Be sure to list all the programs that are under the initiative. Note: All Community Benefit initiatives must submit financial and programmatic data in CBISA Online.

**Program:** A program is defined as a program or service provided to benefit the community (in alignment with guidelines) and entered in CBISA Online (Lyon Software). Please be sure to report on all community benefit programs. Note: All community benefit programs, defined as “programs”, are required to include financial and programmatic data into CBISA Online.

**Goal (Anticipated Impact):** The goal is the desired ultimate result for the initiative’s or program’s efforts. This result may take years to achieve and may require other interventions as well as this program. (E.g. increase immunization rates; reduce obesity prevalence.).

**Scope (Target Population):** Definition of group being addressed in this initiative: specific description of group or population included (or not included, if relevant) for whom outcomes will be measured and work is focused. Identify if this initiative is primarily for persons living in poverty or primarily for the broader community.

**Outcome measure:** An outcome measure is a quantitative statement of the goal and should answer the following question: “How will you know if you’re making progress on goal?” It should be quantitative, objective, meaningful, and not yet a “target” level.
