System Library Services

Introduction for PSJH Nursing Staff
Library Website – http://www.psjhealth.org/library

- Available on site and remotely.
- Doesn’t require logging into local networks.
- Offers improved remote access.
How to access remotely

Login screen will only appear if you click on subscribed content.

- Most commonly a Find Your Organization box pops up (below left). To login follow instructions below.
- Sometimes applications bypass that step and go directly to the **Choose How to Sign in** box. Select the institution and log in as above.
- If a PING or Okta box comes up instead, just log in with your PJSH credentials.

Click on Find Your Organization and select Providence St. Joseph Health.

Select your legacy institution and log in with your local credentials (e.g. Okta, Epic, network UN/PW).

University of Providence non-PSJH students and faculty select OpenAthens.
More goodies!

Detailed information at: http://www.psjhealth.org/library/library-services
An institutional repository for collecting published articles, book chapters, posters, presentations, images, videos, data sets, and more. A place for nursing new knowledge!

One convenient place for all of the new knowledge created by PSJH caregivers.

Digital Commons aims to activate the voice of PSJH and share our research accomplishments as a world-class research organization.
• Searchable and organized by Clinical Institute and Discipline/Department

• Links to PubMed record & available full-text

• Include links/downloads to PPT slides, posters, other multimedia

• Ability to follow categories or author

• Results are search engine optimized, so they show up at the top of Google searches.
Expert Gallery – individual portfolio

- Provides unique URL to content that can be shared with colleagues and patients.
- Let’s readers follow a specific author.

- Researcherwriter-centered portfolio for all publications, presentations, and posters.
- Multimedia.
Looking for information? Where to look?

• Looking for evidence? Use a database (start with MEDLINE):
  o PubMed or Ovid MEDLINE – more than 27 million references in medicine, nursing, public and allied health, includes Cochrane
  o Cochrane – home of the systematic reviews (searchable in MEDLINE and CINAHL)
  o CINAHL – 3.8 million references in nursing and allied health

• Looking for background information?
  o UpToDate
  o ClinicalKey
  o Textbooks (electronic)

• Looking for that one perfect article?
  o PubMed using keywords
  o Library super search box
  o Google Scholar (linked to library holdings)
Additional Nursing Resources

What is there

Nursing Resources

- AACN Procedure Manual for High Acuity, Progressive, and Critical Care - 7th Ed. 2017
- ANA Nursing Scope and Standards of Practice
- AORN Guidelines for Perioperative Practice
- AORN Videos - contact librarian for access
- APIC Textbook
- ASPAN 2017-2018 PeriAnesthesia Nursing Standards, Practice Recommendations and Interpretive Statements
- AWHONN's Perinatal Nursing
- Code of Ethics for Nurses with Interpretive Statements - READ ONLY
- Davis' Drug Guide for Nurses
- Infusion Therapy Standards of Practice
- Lippincott Manual of Nursing Practice, 10th Ed. 2014
- Lippincott Nursing Procedures, 7th Ed. 2016
- Lippincott's Video Series - Nursing Procedures
- Oncology Nursing Society books
- Scope and Standards of Practice by specialty
- R2Library
- STATRef
How to look?

• Start with a focused topic
• Develop your PICO/T
• Identify keywords/subject headings you want to search and plan how you are going to connect the terms
• Search each keywords/subject separately
• Use filters and limits to narrow your search
PICO(T) Refresher

- **P**: Population or problem
- **I**: Intervention or interest
- **C**: Comparator
- **O**: Outcome
- **(T)**: Time
Search techniques – subject Headings vs Keywords

- **Subject Headings:**
  - standardized set of terms used to index articles and books, for example
  - MeSH – Medical Subject Headings

- **Keywords:**
  - words from a title, abstract, etc.
Subject heading vs keywords - pros & cons

Subject Headings

Pros:
• More precise, fewer irrelevant results
• Don’t need to think of synonyms

Cons:
• Need to know the exact word or phrase used in the database or catalog you’re using. No guessing!
• Only looks for the term in the subject field
• Subject heading may not exist
• Human indexing is imperfect

Keywords

Pros:
• Looks for words in many places in the record
• Don’t need to know specialized language/terms
• Larger number of results

Cons:
• Have to think of all synonyms
• May get too many results; more irrelevant hits
• Can’t be sure you’ve gotten all the results on your topic
Organizing Your Search

- Search each concept separately
- Combine your terms using AND/OR (Boolean operators):
  - **AND** – narrows the search; finds articles that include both terms, e.g. *pressure ulcers AND inpatients*
  - **OR** – broadens the search; finds articles that include each of the terms. **OR** is often used to combine different terms that describe the same concept, e.g. *bedsores OR pressure ulcers OR bed sore OR bed sores OR bed sore OR decubitus*
  - **NOT** – narrows the search; finds articles that exclude one term, but will exclude ALL articles with that word. Use with caution!
- Use limiters and filters (article type – *e.g. Systematic Reviews*, years, language) to narrow down your search.
How it works

AND

Both terms

puppy

kitten

OR

Either term

puppy

kitten

NOT

Just one term

puppy

kitten

Want to see AND in action? Check out https://pubvenn.appspot.com/about.html
Putting it all together

PICOT:
What are the best interventions to prevent pressure ulcers in hospitalized patients?

• Population – inpatients/hospitalized patients
• Intervention – interventions to prevent pressure ulcers
• Comparator – none
• Outcome – prevention of pressure ulcers
• Time – while patient hospitalized
Search using Subject Headings (MeSH)

Subject Headings:

In PubMed you can type it like this:

("Pressure Ulcer/prevention and control"[Mesh]) AND ("Hospitalization"[Mesh]) OR "Inpatients"[Mesh] OR "Hospitals"[Mesh])
Search using Keywords

Keywords:
pressure ulcers OR pressure ulcer OR bedsores OR bedsore OR bed sore OR bed sores AND inpatient OR inpatient OR hospitalized AND prevent OR prevention OR prophylaxis

In PubMed you can type it like this:

(pressure ulcers OR pressure ulcer OR bedsores OR bedsore OR bed sore OR bed sores) AND (inpatient OR inpatient OR hospitalized) AND (prevent OR prevention OR prophylaxis)
Focus it

Narrow down your search by:

• Language,
• Publication years,
• Article type – e.g. randomized controlled trial, systematic review, meta-analysis
• Population age – child, infant, adult, aged, etc.
Need a quick refresher – find the tutorials

The CINAHL and PubMed for Nurses tutorials are designed with nursing questions in mind.
