

# Providence Regional Cancer Partnership

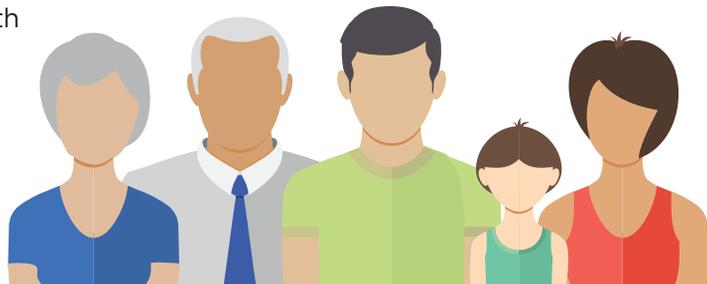

*World-class care, close to home*

# One-stop care for cancer patients & families

Providence Regional Cancer Partnership (PRCP) is a comprehensive, regional, state-of-the-art, single destination designed exclusively for the cancer patient and family with integrated and seamless clinical, operational and business processes.

The PRCP offers all aspects of outpatient cancer care under one roof—including chemotherapy, radiation oncology, clinical research, integrative medicine and counseling services. It is home to world-class cancer technology and expertise, set in an environment that is both state-of-the-art and life-affirming for patients and family members.

## Quality and safety distinctions

Cancer Resource Center

## A short history

Founded in 2007, the Providence Regional Cancer Partnership is the result of a collaboration among four leading medical groups—Providence Regional Medical Center Everett, The Everett Clinic, Western Washington Medical Group, and Northwest Washington Radiation Oncology Associates.

Our vision inspires us to go beyond in the way we treat cancer patients every single day. For us, this means pairing state-of-the-art technology and medicine with a highly personalized team approach to our patients' care—all close to their home and personal support network.
