

A spinal cord injury can happen to anyone at any age. In 2020, St. Luke's provided inpatient rehabilitation services to more than 145 inpatients and 40 outpatients who suffered a spinal cord injury or illness. This includes traumatic and nontraumatic injuries resulting in tetraplegia or paraplegia. The ratio of male and female inpatient program is 50% male and 50% female. Our outpatient program is 80% male, 20% female and our inpatients average 3.5 hours of therapy per day.

Patient Satisfaction— based on a national survey from Uniform Data System for Medical Rehabilitation (UDSMR), MedTel Outcomes and Focus on Therapeutic Outcomes (FOTO), patients rated the following:

OUTPATIENT SATISFACTION

17 average number of visits

94% overall satisfaction

INPATIENT SATISFACTION

13.3% to long term care

10.5% to acute care hospital

76.2% discharged to the community

Support Group

St. Luke's offers a virtual support group for patients who have suffered a spinal cord injury.

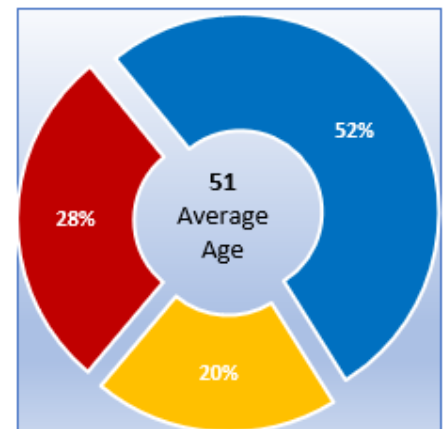

To register to attend, please call (509) 473-6681 or email:

[srlsupportgroups@st-lukes.org](mailto:supportgroups@st-lukes.org)

In person support groups may be available in the future.
