

## 2021 COMMUNITY BENEFIT SNAPSHOT

# We invest in Southern California's health.

Caring for our communities is vitally important. To achieve our vision of health for a better world, we work closely with local partners to ensure we respond to the most pressing needs.

### Taking action on health challenges

In 2021, we continued to focus on pandemic response and other core priorities including equitable access to care, housing and homelessness, mental health and substance use, and food insecurity.

### Bringing our Mission to life

At Providence, we are dedicated to improving community health and reducing disparities in the Western U.S. and beyond. Called by our Mission, we are steadfast in serving all, especially those who are poor and vulnerable.

Community health improvement and strategic partnerships  
**\$69.5 MILLION**

Health professions education and research  
**\$10 MILLION**

Subsidized health services  
**\$24 MILLION**

Free and discounted care for the uninsured and underinsured  
**\$53 MILLION**

Unpaid cost of Medicaid and other means-tested government programs  
**\$451 MILLION**

\*Data is consolidated based on unaudited financial reporting.

The numbers include home and community care investments and joint ventures by percentage ownership.

# Our shared values in action

## Partnering to bring care and support directly to our patients

Caregivers at Providence are living our vision of health for a better world by reaching beyond our facilities and clinics to provide care, services and support throughout Southern California.

In the High Desert, Providence partners with the Hesperia School District to make mental health services available to the region's youth, including a wellness center at a middle school where two children died by suicide. Other partnerships connect post-acute services and support with youth who visit the Providence Saint Mary Medical Center emergency department following a suicide attempt or suicidal thoughts. For adults in Los Angeles

County, Providence partnered with Live Chair Health to launch a high blood pressure reduction campaign to reach 100,000 customers of barber shops and hair salons. Live Chair trains staff at these locations to serve as community liaisons, providing information on hypertension and offering an on-the-spot blood pressure test.

Community-based care helps reduce barriers to health. That is why Providence Little Company of Mary and Charles Drew University School of Medicine and Science developed a community health worker academy. Graduates are equipped to engage with community members, and the first cohorts reached more than 7,500 people during their internships. In Orange County, Providence St. Jude worked with the City of Anaheim and St. Jude Neighborhood Health Centers to open a federally qualified health center to serve those who are uninsured and under-insured. Necessary medical, dental and mental health services are available.

Together, we are following our Mission of steadfast service to all, investing in care and services with a special focus on underserved areas and vulnerable people.

“ In the tradition of our founding sisters, Providence offers compassionate care to those most in need, bringing to life our heartfelt promise to everyone we touch: Know me, care for me, ease my way. ”
