EXECUTIVE SUMMARY

Providence continues its Mission of service in Sonoma County through Petaluma Valley Hospital. Petaluma Valley Hospital is a community hospital founded in 1980 and located in Petaluma, CA. The hospital’s service area is the entirety of Sonoma County, including about 492,000 people.

Petaluma Valley Hospital dedicates resources to improve the health and quality of life for the communities it serves, with special emphasis on the needs of people experiencing social inequities and health disparities. The Community Health Needs Assessment (CHNA) is an opportunity for Petaluma Valley Hospital to engage the community every three years with the goal of better understanding community strengths and needs. The results of the CHNA are used to guide and inform efforts to better address the needs of the community. Through a mixed-methods approach, using quantitative and qualitative data, the CHNA process relied on several sources of information: state and national public health data, qualitative data from interviews with community key informants and listening sessions with community members, and hospital utilization data.

Petaluma Valley Hospital Community Health Improvement Plan Priorities

As a result of the findings of our 2023 CHNA and through a prioritization process aligned with our Mission, resources, and hospital strategic plan, Petaluma Valley Hospital will focus on the following areas for its 2024-2026 Community Benefit efforts:

BEHAVIORAL HEALTH AND SUBSTANCE USE

Publicly available, data along with Providence hospitalization data, show worsening trends of individuals experiencing a behavioral health crisis, many of whom are utilizing emergency rooms for care. Substance Use Disorder was identified as the leading behavioral health diagnosis being treated at Santa Rosa Memorial and Petaluma Valley Hospitals. Key Informants, community members, and caregivers all shared that lack of behavioral health and substance use services was a major barrier in Sonoma County. Lack of bilingual/bicultural providers and absence of medical detox were also commonly voiced needs. Data showed particular concern for youth.

ACCESS TO HEALTH CARE AND DENTAL SERVICES

Fewer people saw a primary care doctor or dentist over the past year in 2022. This trend coupled with qualitative data expressing lack of primary, medical and dental providers highlighted lack of appropriate level of health care access in Sonoma County. Emergency transport times were some of the longest in the State of California in Northern Sonoma County. Key Informants and Caregivers expressed the need for extended hours, bilingual/bicultural providers and transportation options to break down access barriers for older adults, people experiencing homelessness, and agricultural workers. Access was noted to be highly linked to economic insecurity.
HOMELESSNESS AND HOUSING INSTABILITY

Over 25% of Sonoma County is experiencing severe house cost burden, spending 50% or more of their household income on housing. Additionally, over 2800 individuals were found to be experiencing homelessness in 2022. Most Key Informants identified the need for additional permanent supportive housing, housing accepting housing vouchers, affordable housing and shelter beds. Older adults and BBiPOC population experience additional barriers to housing in Sonoma County.

AGING ISSUES

There is a growing population of older adults (over 60) in Sonoma County without adequate resources to meet their needs. Older adults experiencing homelessness and housing instability as well as mental health issues due to isolation is on the rise in Sonoma County. A lack of providers with experience with geriatric conditions is of concern.

RACISM AND DISCRIMINATION

While the need area “Racism and Discrimination” was not voted as a top priority by our Community Benefit Committee, the Committee and Community Health Investment department recognize that racism and discrimination was a crosscutting theme and root cause among all prioritized needs areas and will be specifically addressed in each prioritized need area as outlined by our Community Health Improvement Plan.
INTRODUCTION

Who We Are

**Our Mission**  We are steadfast in serving all within our communities, especially those who are poor and vulnerable.

**Our Vision**  Health for a Better World.

**Our Values**  Compassion — Dignity — Justice — Excellence — Integrity

Petaluma Valley Hospital is a community hospital founded in 1980 and located in Petaluma, CA. The hospital has 80 licensed beds, a staff of more than 275 caregivers, and professional relationships with more than 260 local physicians. Major programs and services offered to the community include emergency care, outpatient surgery, and pulmonary rehabilitation.

Our Commitment to Community

Petaluma Valley Hospital dedicates resources to improve the health and quality of life for the communities we serve. For more information on the resources invested to improve the health and quality of life for the communities we serve, please refer to our Annual Report to our Communities: [https://www.providence.org/about/annual-report](https://www.providence.org/about/annual-report).

Health Equity

At Providence, we acknowledge that all people do not have equal opportunities and access to living their fullest, healthiest lives due to systems of oppression and inequities. We are committed to ensuring health equity for all by addressing the underlying causes of racial and economic inequities and health disparities. Our Vision is “Health for a Better World,” and to achieve that we believe we must address not only the clinical care factors that determine a person’s length and quality of life, but also the social and economic factors, the physical environment, and the health behaviors that all play an active role in determining health outcomes.

To ensure that equity is foundational to our CHIP, we have developed an equity framework that outlines the best practices that each of our hospital will implement when completing a CHIP. These practices include, but are not limited to the following:
Planning for the Uninsured and Underinsured

Our Mission is to provide quality care to all our patients, regardless of ability to pay. We believe that no one should delay seeking needed medical care because they lack health insurance. That is why Petaluma Valley Hospital has a Financial Assistance Program (FAP) that provides free or discounted services to eligible patients.

One way Petaluma Valley Hospital informs the public of FAP is by posting notices. Notices are posted in high volume inpatient and outpatient service areas. Notices are also posted at locations where a patient may pay their bill. Notices include contact information on how a patient can obtain more information on financial assistance as well as where to apply for assistance. These notices are posted in English and Spanish and any other languages that are representative of 5% or greater of patients in the hospital’s service area. All patients who demonstrate lack of financial coverage by third party insurers are offered an opportunity to complete the Patient Financial Assistance Application and are offered information, assistance, and referral as appropriate to government sponsored programs for which they may be eligible. For information on our Financial Assistance Program click here.
OUR COMMUNITY

Description of Community Served

Petaluma Valley Hospital’s service area is Sonoma County and includes a population of approximately 492,000 people.

To facilitate identifying health disparities and social inequities by place, we designated a “high need” service area and a “broader” service area, which together make up the Sonoma County Service Area. Based on work done by the Public Health Alliance of Southern California and their Healthy Places Index (HPI) tool, we identified the high need service area based on income, education, English proficiency, and life expectancy.¹

¹ The following variables were used for the PNI analysis: Population below 200% the Federal Poverty Level (American Community Survey, 2021); Percent of population with at least a high school education (American Community Survey, 2021); Percent of population, ages 5 Years and older in Limited English Households (American Community Survey, 2021); Life expectancy at birth (estimates based on CDC, 2010 – 2015 data)
Community Demographics

POPULATION AND AGE DEMOGRAPHICS

The following population demographics for Sonoma County are from the 2021 American Communities Survey 5-year estimates. 50.9% of people living in Sonoma County are female, and 49.1% are male. The high need service area predominantly houses a younger population, with individuals under the age of 55 being more prevalent. Conversely, the broader service area tends to host a higher proportion of older adults aged 55 and above. This demographic distribution may be attributed partially to the prevalence of secondary and/or vacation homes.

POPULATION BY RACE AND ETHNICITY

In Sonoma County, there are noticeable disparities in the distribution of racial and ethnic groups across different census tracts. The 'other race' population is notably overrepresented in high-need census tracts compared to the county's overall population. Conversely, individuals who identify as white are less likely to reside in high-need communities.

Additionally, there is a significant overrepresentation of individuals identifying as Hispanic in high-need communities, constituting nearly 38% of the population in those areas, compared to just under 20% in the broader service area. In Sonoma County, approximately 6.5% of the population are veterans, slightly higher than the 4.8% in the state of California.

SOCIOECONOMIC INDICATORS

</tbody>
</table>

Household median incomes includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

The broader service area has a median income of $117,926, which is $27,059 greater than Sonoma County and $40,774 greater than the high need service area.
Severe housing cost burden is defined as renter households that are spending 50% or more of their income on housing costs. About 25% of households in Sonoma County are severely housing cost burdened, which is slightly lower than the state of California overall.

In the high need service area, about 28% of renter households are severely housing cost burdened. Within Sonoma County there are census tracts in which over 40% of households are experiencing severe housing cost burden.

Full demographic and socioeconomic information for the service area can be found in the 2023 CHNA for Petaluma Valley Hospital.
Summary of Community Needs Assessment Process and Results

In our Community Needs Assessment Process, we employed a mixed-methods approach, integrating both quantitative and qualitative data. Data was collected from various reliable sources, including the American Community Survey, Behavioral Risk Factor Surveillance System, local public health databases, hospital-level records, and public health datasets focusing on health behaviors, morbidity, and mortality.

To ensure active community engagement, we collaborated with On the Margins, Inc. to facilitate three listening sessions. These sessions were specifically designed to gather insights from individuals with chronic conditions, diverse backgrounds, low-income backgrounds, and those who are medically underserved. Additionally, we conducted 14 key informant interviews with representatives from organizations serving these populations. Through these interviews, our aim was to delve deeper into understanding community strengths and opportunities.

Some key takeaways include the following:

- Lack of affordable housing with increased barriers for those with disabilities, older adults, and the BBPIOC community.
- Limited access to and availability of behavioral health and substance use services.
- Limited access to primary and specialty medical care providers.
- Economic insecurities with increased barriers related to racism and discrimination.
- Strengths included community resiliency and community-based organization collaboration.

Significant Community Health Needs Prioritized

The list below summarizes the rank-ordered significant health needs identified through the 2023 Community Health Needs Assessment process:

BEHAVIORAL HEALTH AND SUBSTANCE USE

Publicly available, data along with Providence hospitalization data, show worsening trends of individuals experiencing a behavioral health crisis, many of whom are utilizing emergency rooms for care. Substance Use Disorder was identified as the leading behavioral health diagnosis being treated at Santa Rosa Memorial and Petaluma Valley Hospitals. Key Informants, community members, and caregivers all shared that lack of behavioral health and substance use services was a major barrier in Sonoma County. Lack of bilingual/bicultural providers and absence of medical detox were also commonly voiced needs. Data showed particular concern for youth.
HOMELESSNESS AND HOUSING INSTABILITY
Over 25% of Sonoma County is experiencing severe housing cost burden, spending 50% or more of their household income on housing. Additionally, over 2800 individuals were found to be experiencing homelessness in 2022. Most Key Informants identified the need for additional permanent supportive housing, housing accepting housing vouchers, affordable housing, and shelter beds. Older adults and BBIPIC population experience additional barriers to housing in Sonoma County.

ACCESS TO HEALTH AND DENTAL CARE
Fewer people saw a primary care doctor or dentist over the past year in 2022. This trend coupled with qualitative data expressing lack of primary, medical and dental providers highlighted lack of appropriate level of health care access in Sonoma County. Emergency transport times were some of the longest in the State of California in Northern Sonoma County. Key Informants and Caregivers expressed the need for extended hours, bilingual/bicultural providers and transportation options to break down access barriers for older adults, people experiencing homelessness, and agricultural workers. Access was noted to be highly linked to economic insecurity.

AGING ISSUES
There is a growing population of older adults (over 60) in Sonoma County without adequate resources to meet their needs. Older adults experiencing homelessness and housing instability, as well as mental health issues due to isolation, is on the rise in Sonoma County. A lack of providers with experience with geriatric conditions is of concern.

RACISM AND DISCRIMINATION
While the need area “Racism and Discrimination” was not voted as a top priority by our Community Benefit Committee, the Committee, and Community Health Investment department recognize that racism and discrimination was a crosscutting theme and root cause among all prioritized needs areas and will be specifically addressed in each prioritized need area as outlined by our Community Health Improvement Plan as indicated by.

Needs Beyond the Hospital’s Service Program
While hospitals play a vital role in addressing community health needs, it is recognized that no single facility can comprehensively tackle all health challenges within its locality. At Petaluma Valley Hospital, we remain steadfast in our mission by fostering collaborations with community organizations to augment our efforts.

The following community health needs identified in the ministry CHNA will not be addressed and an explanation is provided below:

- Economic Insecurity: Economic insecurity affects many other needs, including educational opportunities, food resources, employment, transportation, and physical and mental health. While Economic Insecurity was an identified significant need, Providence Community Health Investment Sonoma County lacks an effective method of intervention. However, systemic
impacts of economic insecurity are identified and addressed through the chosen priority need areas outlined in this document.
Summary of Community Health Improvement Planning Process

The 2024-2026 Community Health Improvement Plan (CHIP) is designed to address the needs identified and prioritized through the 2023 Community Health Needs Assessment (CHNA). We recognize the greatest needs of our community will change over time, and we are dedicated to adapting our efforts accordingly. Our commitment remains steadfast in supporting, strengthening, and serving our community in alignment with our Mission, utilizing our expertise, and maximizing the impact of Community Benefit resources.

The Petaluma Valley Hospital CHIP process was led by the Senior Manager of Community Health Investment and the Community Health Investment staff with review and approval from the Community Benefit Committee. Strategies outlined in the CHIP encompass a diverse array of approaches, including direct service programming goals, support for community organizations, and collaborative commitments aimed at addressing the identified priority need areas.

While Racism and Discrimination was not designated as a standalone priority area, the Community Benefit Committee made a deliberate decision to incorporate strategies addressing the needs of the Black, Brown, Indigenous, and People of Color (BBIPOC) community and those most likely to experience discrimination within each priority area. This acknowledgment underscores our commitment to addressing health disparities and promoting equity across all facets of our community health initiatives.

Addressing the Needs of the Community: 2024-2026 Key Community Benefit Initiatives and Evaluation Plan

COMMUNITY NEED ADDRESSED #1: BEHAVIORAL HEALTH AND SUBSTANCE USE

Long-Term Goal(s)/ Vision

To reduce substance use disorders (SUD) and mental health conditions through evidence-based and community-led prevention, treatment, and recovery support services that are equitable, high-quality, culturally responsive, and linguistically appropriate, especially for populations with low incomes.

* Indicates a strategy focused on addressing Racism and Discrimination

**Evidence Based Sources**

- Emergency Department Access to Buprenorphine for Opioid Use Disorder
- Bridge to Treatment
- CalAIM ECM Fact Sheet

**Resource Commitment**

Petaluma Valley Hospital is dedicated to addressing the behavioral health and substance use needs of our community through various programs and initiatives.

**Mobile Health Clinic**

The Providence Mobile Health Clinic will allocate staff time to provide essential services to populations facing challenges in accessing healthcare. These services will be tailored to meet the unique needs of individuals struggling with behavioral health and substance use disorders.

We recognize the importance of collaboration in expanding access to behavioral health and substance use services. Therefore, our Mobile Health Clinic will actively seek opportunities to partner with both internal and external providers in the community. By leveraging existing relationships and trust within the community, we aim to enhance and diversify the range of services available.

**CARE Network’s Enhanced CARE Management Team**

The CARE Network’s Enhanced Care Management (ECM) team remains committed to providing comprehensive case management to individuals grappling with behavioral health and substance use disorders. This includes both acute care interventions, such as Substance Use Navigation and Medication Assisted Treatment Connection, as well as outpatient support. ECM, a statewide Medi-Cal benefit, offers wrap-around care management to address the complex social and medical needs of its members. In Sonoma County, ECM extends its outreach to populations experiencing homelessness, behavioral health issues, substance use disorders, and other social determinants of health that hinder quality of life and overall health outcomes.

COMMUNITY NEED ADDRESSED #2: ACCESS TO HEALTH AND DENTAL CARE

Long-Term Goal(s)/ Vision

To improve access to equitable and culturally responsive health care and preventive resources for people with low incomes and those underinsured by deploying programs to assist with navigating the health care system. This will ease the way for people to access the appropriate level of care at the right time.

Resource Commitment

Petaluma Valley Hospital is deeply committed to enhancing access to health and dental care in our community through various initiatives and partnerships. Through these initiatives, Petaluma Valley Hospital endeavors to bridge the gap in access to health and dental care, promoting the overall health and vitality of our community.

Community Health Worker Program

Our community health worker program, known as Promotores de Salud, plays a pivotal role in providing free culturally responsive screenings and health education. Through site visits and health fairs, these dedicated individuals cater to the needs of Latino and other vulnerable populations, ensuring equitable access to essential health services.

CARE Network and Enhanced Care Management

The CARE Network and Enhanced Care Management team delivers comprehensive case management services in both English and Spanish. By addressing social determinants of health needs and providing chronic disease management support, they strive to enhance the well-being of individuals requiring specialized assistance.

Staff and Grant Allocation

To address gaps in access to care, Petaluma Valley Hospital will allocate staff from its Community Health Investment department and leverage grants to support targeted interventions.

- State of Housing in Sonoma County 2023 Report

**Resource Commitment**

Petaluma Valley Hospital is committed to addressing homelessness and housing instability in our community through targeted initiatives and collaborations.

**Enhanced Care Management Program**

Our Community Health Investment's CARE Network team will allocate dedicated staff time to work with the identified population of "Chronically Homeless" individuals within the Enhanced Care Management program. This initiative, in partnership with Partnership Health Plan, aims to increase enrollment and enhance support for individuals experiencing chronic homelessness.
Support for Respite Shelters

Community Health Investment will continue to provide vital support to Project Nightingale and Committee on the Shelterless (COTS) respite shelters. This commitment ensures the provision of safety and support for individuals transitioning out of hospital care and facing housing insecurity.

Medical Legal Partnership

In addition to supporting shelter initiatives, Community Health Investment will continue funding for our Medical Legal Attorney program. This initiative provides free legal services to our most vulnerable community members who are often at risk of discrimination, contributing to efforts to address systemic barriers to housing stability.

Providence Government Affairs

Community Health Investment will work in collaboration with Providence Government Affairs leadership to identify appropriate endorsements related to aligned housing policy and advocacy efforts in Sonoma County.

- AAA Needs Assessment
- Master Plan for Aging

Resource Commitment

Petaluma Valley Hospital is committed to addressing the unique needs of older adults in our community through targeted initiatives and partnerships. Through these commitments, Petaluma Valley Hospital aims to enhance the quality of life and promote the independence of older adults, ensuring they receive the necessary support and resources to age with dignity.

Direct Service Programming

Petaluma Valley Hospital will allocate staff resources through its Community Health Investment department to support direct service programming, including initiatives such as the Mobile Health Clinic and CARE Network for healthcare services and navigation for adults over 60.

“We Care” Fund

Community Health Investment allocates funding to the "We Care" fund, which is dedicated to providing Private Duty Caregiving services for community members, with a particular focus on older adults. This
initiative aims to support older adults who are unable to perform activities of daily living independently, enabling them to remain healthy and independent at home while awaiting long-term care solutions.

**Providence Supportive Housing, Rohnert Park Senior Housing Project**

Petaluma Valley Hospital will dedicate staff time from its Community Health Investment department to contribute to the planning and convening of the senior housing project in Rohnert Park. Additionally, funds from Santa Rosa Memorial Hospital’s Care for the Poor program will be directed towards supporting this project, our commitment to providing safe and supportive housing options for older adults in our community, ensuring they have access to housing that meets their needs and promotes their overall well-being.
