EXECUTIVE SUMMARY

Our Mission
To extend the healing ministry of Jesus in the tradition of the Sisters of St. Joseph of Orange by continually improving the health and quality of life of people in the communities we serve.

Our Vision
We bring people together to provide compassionate care, promote health improvement and create healthy communities.

Our Values
The four core values of St. Joseph Health -- Service, Excellence, Dignity and Justice -- are the guiding principles for all we do, shaping our interactions with those whom we are privileged to serve.

INTRODUCTION
Who We Are and Why We Exist
St. Joseph Health, St. Joseph Hospital of Orange (SJO) is an acute-care hospital founded in 1929, located in Orange, California. The facility has 463 licensed beds, and a campus that is approximately 33 acres in size. St. Joseph Hospital is one of 15 health care ministries within the St. Joseph Health System (SJHS), the 10th largest not-for-profit health system in the United States. SJO has a staff of 3,800 and professional relationships with more than 1,000 local physicians. At SJO, we are proud to provide our patients with a broad range of services on our modern campus that allow for us to more accurately treat complex medical conditions. From bariatric surgery to cardiac care, cancer treatment and our cutting-edge maternity center, we are proud to offer a wide variety of services to meet the specific medical needs of our community.

Community Benefit Investment

In FY16, community benefit investments totaled $78,624,494. This included services to the poor, vulnerable and at risk populations as well as for the broader community. Unpaid costs to Medicare totaled $33,258,457 for FY16.

Overview of Community Health Needs and Assets Assessment
SJO completed a needs assessment in 2014. In 2012 and 2013, SJO gathered information to complete its needs assessment. Community input was obtained through a phone survey, five focus groups, and interviews with five leaders in the community. Information about the community also was pulled from the Office of Statewide Health Planning and Development (OSHPD), the 2010 Census and the American Community Survey (ACS).

In preparing the Community Health Needs Assessment, SJH worked with Professional Research Consultants, Inc. (PRC) to conduct and analyze the community survey, and The Olin Group, Inc. to conduct interviews and focus groups and to summarize all the community input.
Community organizations that participated in this process included The Cambodian Family, Delhi Center, Healthy Smiles for Kids - Orange County, Lestonnac Free Clinic, Orange County Health Care Agency, and Valley High School. Interviewees represented organizations that serve low-income, medically underserved residents of SJO's
community benefits service area. Focus group participants were all community members and/or patients of the hospital or its clinics as well as Spanish or Khmer speaking individuals.

A variety of methods and sources were used to gather primary and secondary data for this needs assessment in order to ensure input from across the community.

Community Plan Priorities/Implementation Strategies

- **Initiative #1: Access to Health Care**
  - SJO Community Clinics served 6,543 patients additionally, 2,337 new patients selected SJO Community Clinics as their medical home which was 3% (57 patients) increase over last fiscal year.
  - We increased the availability of Specialty Care providers successfully through a collaborative partnership with St. Joseph Heritage Medical Group. SJO Community Clinics acquired 19 specialty groups with access to 125 specialty care providers.

- **Initiative #2: Chronic Disease Management**
  - The total number of diabetic patients who were “uncontrolled” decreased from 536 to 497. The Vision Mobile Clinic increased the number of patients seen by 46. Totaling the number of diabetic patients to 907, of those 679 (75%) received a diabetic eye exam. A 9% increase from the previous fiscal year.

- **Initiative #3: Mental Health**
  - We determined a need for intervention to provide comprehensive mental health services to clinic patient population. St. Jude Medical Center, Mission Hospital, Hoag Hospital and St. Joseph Hospital have entered into a collaborative partnership to address the unmet need for behavioral health services for the most underserved population in Orange County.
  - The Regional psychiatry collaborative project provides low income patients served by the ministries with medication management through a Psychiatrist as well as care coordination to ensure continuum of care through the community clinics. Assessment and counseling is provided at La Amistad, St. Jude, FRC Mission Viejo and Center for Healthy Living Costa Mesa or referred out to the new OC Health Care Agency Behavioral Health Services. The Psychiatrist and Care Coordinator travel to each site to provide medication management, evaluations in coordination with primary care sites. The Licensed Clinical Social Worker (LCSW) provides cognitive behavioral therapy to patients referred by the psychiatrist and clinic providers.
INTRODUCTION
Who We Are and Why We Exist
As a ministry founded by the Sisters of St. Joseph of Orange, SJO lives out the tradition and vision of community engagement set out hundreds of years ago. The Sisters of St. Joseph of Orange trace their roots back to 17th century France and the unique vision of a Jesuit Priest named Jean-Pierre Medaille. Father Medaille sought to organize an order of religious women who, rather than remaining cloistered in a convent, ventured out into the community to seek out “the Dear Neighbors” and minister to their needs. The congregation managed to survive the turbulence of the French Revolution and eventually expanded not only throughout France but throughout the world. In 1912, a small group of the Sisters of St. Joseph traveled to Eureka, California, at the invitation of the local Bishop, to establish a school. A few years later, the great influenza epidemic of 1918 caused the sisters to temporarily set aside their education efforts to care for the ill. They realized immediately that the small community desperately needed a hospital. Through bold faith, foresight and flexibility, in 1920, the Sisters opened the 28 bed St. Joseph Hospital Eureka and the first St. Joseph Health ministry.

Mission, Vision and Values and Strategic Direction

Our Mission
To extend the healing ministry of Jesus in the tradition of the Sisters of St. Joseph of Orange by continually improving the health and quality of life of people in the communities we serve.

Our Vision
We bring people together to provide compassionate care, promote health improvement and create healthy communities.

Our Values
The four core values of St. Joseph Health -- Service, Excellence, Dignity and Justice -- are the guiding principles for all we do, shaping our interactions with those whom we are privileged to serve.

St. Joseph Hospital has been meeting the health and quality of life needs of the local community for over 85 years. Serving the communities of Anaheim, Garden Grove, Huntington Beach, Orange, Santa Ana, Tustin and Westminster, St. Joseph Hospital is an acute care hospital that provides quality care in the areas of bariatric surgery, behavioral health, cardiac care, cancer treatment, nasal and sinus center, kidney dialysis center, orthopedic services and our cutting-edge maternity center. With 2,840 employees committed to realizing the mission, St. Joseph Hospital is one of the largest employers in the region.

Strategic Direction
As we move into the future, St. Joseph Hospital is committed to furthering our mission and vision while transforming healthcare to a system that is health-promoting and preventive, accountable in its inevitable rationing decisions, integrated across a balanced network of care and financed according to its ability to pay. To make this a reality, over the next five years (FY14-18) St. Joseph Health and St. Joseph Hospital are strategically focused on two key areas to which the Community Benefit (CB) Plan strongly align: population health management and network of care. Population-based care includes the recognition that social determinants of health such as poverty,
education, crime, geography and pollution drive a significant part of society’s health outcomes. A network of care will be a systems change approach to providing comprehensive and holistic care to the communities we serve.

**Community Benefit Investment**

In FY16, St. Joseph Hospital invested $78,624,494 in community benefit. This included services to the poor, vulnerable and at risk populations as well as for the broader community. For FY16, St. Joseph Hospital had an unpaid cost of Medicare that totaled $33,258,457.

**ORGANIZATIONAL COMMITMENT**

**Community Benefit Governance Structure**

St. Joseph Hospital dedicates resources to improve the health and quality of life for the communities it serves, with special emphasis on the needs of the economically poor and underserved.

In 1986, St. Joseph Health created the St. Joseph Health Community Partnership Fund (SJH CPF) (formerly known as the St. Joseph Health System Foundation) to improve the health of low-income individuals residing in local communities served by SJH hospitals.

Each year St. Joseph Hospital allocates 10% of its net income (excluding unrealized gains and losses) to the St. Joseph Health Community Partnership Fund. (See Figure 1). 7.5% of the contributions are used to support local hospital Care for the Poor programs. 1.75% is used to support SJH Community Partnership Fund grant initiatives. The remaining .75% is designated toward reserves, which helps ensure the Fund’s ability to sustain programs into the future that assist low-income and underserved populations.

Furthermore, St. Joseph Hospital will endorse local non-profit organization partners to apply for funding through the St. Joseph Health Community Partnership Fund. Local non-profits that receive funding provide specific services and resources to meet the identified needs of underserved communities throughout St. Joseph Health hospitals’ service areas.

**Community Benefit Governance Structure**

St. Joseph Hospital further demonstrates organizational commitment to the community benefit process through the allocation of staff time, financial resources, participation and collaboration. The Vice President of Mission Integration and the Director of Community Outreach are responsible for coordinating implementation of California
Senate Bill 697 provisions and Federal 501r requirements as well as providing the opportunity for community leaders and internal hospital Executive Management Team members, physicians and other staff to work together in planning and implementing the Community Benefit Plan.

The Community Benefit (CB) Management Team provides orientation for all new Hospital employees on Community Benefit programs and activities, including opportunities for community participation.

A charter approved in 2007 establishes the formulation of the St. Joseph Hospital Community Benefit Committee. The role of the Community Benefit Committee is to support the Board of Trustees in overseeing community benefit issues. The Committee acts in accordance with a Board-approved charter. The Community Benefit Committee is charged with developing policies and programs that address identified needs in the service area particularly for underserved populations, overseeing development and implementation of the Community Health Needs Assessment and Community Benefit Plan/Implementation Strategy Reports, and overseeing and directing the Community Benefit activities.

The Community Benefit Committee has a minimum of eight members including three members of the Board of Trustees. Current membership includes 5 members of the Board of Trustees and 7 community members. A majority of members have knowledge and experience with the populations most likely to have disproportionate unmet health needs. The Community Benefit Committee generally meets bimonthly.

Roles and Responsibilities

Senior Leadership

- CEO and other senior leaders are directly accountable for Community Benefit performance.

Community Benefit Committee (CBC)

- CBC serves as an extension of trustees to provide direct oversight for all charitable program activities and ensure program alignment with Advancing the State of the Art of Community Benefit (ASACB) Five Core Principles. It includes diverse community stakeholders. Trustee members on CBC serve as ‘board level champions’.
- CBC provides recommendations to the Board of Trustees regarding budget, program targeting and program continuation or revision.

Community Benefit (CB) Department

- Manages CB efforts and coordination between CB and Finance departments on reporting and planning.
- Manages data collection, program tracking tools and evaluation.
- Develops specific outreach strategies to access identified Disproportionate Unmet Health Needs (DUHN) populations.
- Coordinates with clinical departments to reduce inappropriate ER utilization.
- Advocates for CB to senior leadership and invests in programs to reduce health disparities.

Local Community

- Partnership to implement and sustain collaborative activities.
- Formal links with community partners.
- Provide community input to identify community health issues.
PLANNING FOR THE UNINSURED AND UNDERINSURED

Patient Financial Assistance Program

**Standard Language:** The St. Joseph Health (SJH) Financial Assistance Program helps to make our health care services available to everyone in our community needing emergent or medically necessary care. This includes people who do not have health insurance and are unable to pay their hospital bill, as well as patients who do have insurance but are unable to pay the portion of their bill that insurance does not cover. In some cases, eligible patients will not be required to pay for services; in others, they may be asked to make partial payment.

At St. Joseph Hospital, our commitment is to provide quality care to all our patients, regardless of their ability to pay. We believe that no one should delay seeking needed medical care because they lack health insurance or are worried about their ability to pay for their care. This is why we have a Financial Assistance Program for eligible patients. In FY16, St. Joseph Hospital, provided **$4,096,529** free (charity care) and discounted care and **12,588** encounters.

For information on our Financial Assistance Program click on the link

**Medi-Cal (Medicaid)**

St. Joseph Hospital provides access to the uninsured and underinsured by participating in Medicaid, also known as Medi-Cal in California. In FY16, St. Joseph Hospital, provided **$66,839,941** in Medicaid shortfall. *(Note: If your ministry is impacted by the Hospital Fee, please work with System office to determine appropriate language)*

**COMMUNITY**

**Defining the Community**

*SJÖ provides central Orange County communities with access to advanced care and advanced caring. The hospital’s service area extends from the 91 Freeway - North boundary, Pacific Coast Hwy - South boundary, 15 Freeway – East boundary, and 605 Freeway – West. Our Hospital Total Service Area includes the cities of Anaheim, Garden Grove, Midway City, Orange, Santa Ana, Tustin, Villa Park, Westminster, Buena Park, Costa Mesa, Fountain Valley, Fullerton, Huntington Beach, Irvine, Lake Forest, and Stanton. This includes a population*
of approximately 2,490,784 people, an increase of 7% from the prior assessment. For a complete copy of St. Joseph Hospital’s FY14 CHNA click here: [http://www.sjo.org/](http://www.sjo.org/)

In central Orange County, an urban metropolis, the region’s economically poor residents face significant challenges and barriers as it relates to achieving optimal health outcomes. In 1993, central Santa Ana was federally designated as a Medically Underserved Area (MUA). South Garden Grove and West Santa Ana were designated as Medically Underserved Populations (MUP). And there were 4 population groups designated as Health Professional Shortage Areas (HPSAs) for primary medical care in East and West Anaheim, South Santa Ana, Garden Grove and North Stanton. According to the Intercity Hardship Index, IHI (see page 12 for more detail on the IHI), 364 out of approximately 400 neighborhood block groups in Orange County with the highest need are within the SJO primary service area. The average annual income per person in the highest need areas within the SJO primary service area ranges from $5,777 to $25,549. The cities of Santa Ana, Anaheim and Placentia have top 4 block groups with 74% to 89% of the population over the age of 25 with less than a high school education. These same cities have top 19 block groups within 22% to 40.7% of households below the Federal Poverty Level. The cities of Anaheim, Huntington Beach, Orange, Placentia, Santa Ana and Stanton have top 42 block groups with 30% to 43% of housing units with 7+ people.

Another helpful tool that quantifies need in communities is the Community Need Index (CNI). The CNI demonstrates need at the Zip Code level. Research indicates a strong correlation between high CNI scores and hospital admission rates. Residents who live in areas with the highest need were twice as likely to experience preventable hospitalization for manageable conditions (i.e. ear infections, pneumonia, etc.). Eight cities (18 zip codes) in central Orange County had a score of “highest need” (see page 12 for more detail on the CNI).

Hospital Total Service Area
The community served by the Hospital is defined based on the geographic origins of the Hospital’s inpatients. The Hospital Total Service Area is the comprised of both the Primary Service Area (PSA) as well as the Secondary Service Area (SSA) and is established based on the following criteria:

- PSA: 70% of discharges (excluding normal newborns)
- SSA: 71%-85% of discharges (draw rates per ZIP code are considered and PSA/SSA are modified accordingly)
- Includes ZIP codes for continuity
- Natural boundaries are considered (i.e., freeways, mountain ranges, etc.)
- Cities are placed in PSA or SSA, but not both

The Primary Service Area (“PSA”) is the geographic area from which the majority of the Hospital’s patients originate. The Secondary Service Area (“SSA”) is where an additional population of the Hospital’s inpatients reside. The PSA is comprised of Anaheim, Garden Grove, Midway City, Orange, Santa Ana, Tustin, Villa Park and Westminster. The SSA is comprised of Buena Park, Corona, Costa Mesa, Cypress, Foothill Ranch, Fountain Valley, Fullerton, Huntington Beach, Irvine, and Lake Forest.

Figure 1. St. Joseph Hospital Total Service Area
The Community Need Index (CNI) was developed by Dignity Health (formerly known as Catholic Healthcare West (CHW)) and Truven Health Analytics. The Community Needs Index (CNI) identifies the severity of health disparity for every zip code in the United States and demonstrates the link between community need, access to care, and preventable hospitalizations.

CNI aggregates five socioeconomic indicators that contribute to health disparity (also known as barriers):

- Income Barriers (Elder poverty, child poverty and single parent poverty)
- Culture Barriers (non-Caucasian limited English)
- Educational Barriers (% population without HS diploma)
- Insurance Barriers (Insurance, unemployed and uninsured)
- Housing Barriers (Housing, renting percentage)

This objective measure is the combined effect of five socioeconomic barriers (income, culture, education, insurance and housing). A score of 1.0 indicates a zip code with the fewest socioeconomic barriers, while a score of 5.0 represents a zip code with the most socioeconomic barriers. Residents of communities with the highest CNI scores were shown to be twice as likely to experience preventable hospitalizations for manageable conditions such as ear infections, pneumonia or congestive heart failure compared to communities with the lowest CNI scores. (Ref (Roth R, Barsi E., Health Prog. 2005 Jul-Aug; 86(4):32-8.) The CNI is used to draw attention to areas that need additional investigation so that health policy and planning experts can more strategically allocate resources.

For example, the ZIP code 92703 on the CNI map is scored 5.0, making it a High Need community.

Figure 2 (following page) depicts the Community Need Index for the hospital’s geographic service area based on national need. It also shows the location of the Hospital as well as the other hospitals in the area that are a part of St. Joseph Health.
Figure 2. SJO Hospital Service Area Community Need Index (Zip Code Level)
Intercity Hardship Index (Block group level) Based Geographic Need

The Intercity Hardship Index (IHI) was developed in 1976 by the Urban and Metropolitan Studies Program of the Nelson A. Rockefeller Institute of Government to reflect the economic condition of cities and allow comparison across cities and across time. The IHI ranges from 0-100, with a higher number indicating greater hardship. The IHI was used by St. Joseph Health to identify block groups with the greatest need.

The IHI combines six key social determinants that are often associated with health outcomes:

1) Unemployment (the percent of the population over age 16 that is unemployed)
2) Dependency (the percent of the population under the age of 18 or over the age of 64)
3) Education (the percent of the population over age 25 who have less than a high school education)
4) Income level (per capita income)
5) Crowded housing (percent of households with seven or more people)
6) Poverty (the percent of people living below the federal poverty level)

Based on the IHI, each block group was assigned a score from 1 (lowest IHI, lowest level of hardship/need) to 5 (highest IHI, highest level of hardship/need). The IHI is based on relative need within a geographic area, allowing for comparison across areas. Similar to what is seen with the Community Need Index; the highest need areas are in the cities of Santa Ana, Anaheim, Garden Grove, Westminster, Midway City, and Buena Park.
Figure 3 (see following page) depicts the **Intercity Hardship Index** for the hospital’s geographic service area and demonstrates relative need.
Figure 3. SJO Intercity Hardship Index (Block group Level)
COMMUNITY HEALTH NEEDS AND ASSETS ASSESSMENT PROCESS AND RESULTS

Summary of Community Needs Assessment Process and Results
SJH completed a needs assessment in 2014. In 2012 and 2013, SJH gathered information to complete its needs assessment. Community input was obtained through a phone survey, five focus groups, and interviews with five leaders in the community. Information about the community was also pulled from the Office of Statewide Health Planning and Development (OSHPD), the 2010 Census and the American Community Survey (ACS).

In preparing the Community Health Needs Assessment, SJH worked with Professional Research Consultants, Inc. (PRC) to conduct and analyze the community survey, and The Olin Group, Inc. to conduct interviews and focus groups and to summarize all the community input.

Community organizations that participated in this process included The Cambodian Family, Delhi Center, Healthy Smiles for Kids - Orange County, Lestonnac Free Clinic, Orange County Health Care Agency, and Valley High School. Interviewees represented organizations that serve low-income, medically underserved residents of SJH’s community benefits service area. Focus group participants were all community members and/or patients of the hospital or its clinics as well as Spanish or Khmer speaking individuals.

A variety of methods and sources were used to gather primary and secondary data for this needs assessment in order to ensure input from across the community.

Primary Data
Survey – Professional Research Consultants, Inc. conducted a survey in 2012 of 1,250 residents in the SJH service area. The survey instrument was based largely on the Centers for Disease Control and Prevention’s Behavioral Risk Factor Surveillance System, as well as various other public health surveys and customized questions addressing gaps in indicator data relative to national health promotion and disease prevention objectives targeted by Healthy People 2020. The responses were weighted to match the demographic characteristics of the population and thereby improve the representativeness of the results.

Interviews – The Olin Group, interviewed five community and health care leaders who are knowledgeable about the health needs of local residents were interviewed in the fall of 2013. One of those interviewed was a representative of the Orange County Health Care Agency (Orange County’s public health department). Each interviewee was provided key findings from the survey and then asked to provide their own insights on the needs of the community. A summary report was prepared that presents the main points from all five interviews.

Focus Groups – A total of 54 community members participated in five focus groups about health needs and quality of life issues in the St. Joseph Hospital service area. The transcripts of four focus groups (40 participants) that were conducted in May 2012 for The Cambodian Family, a local nonprofit organization, were analyzed for this assessment. Two of the focus groups were conducted in Spanish, and two in Khmer. All four asked about health and quality of life challenges in the Santa Ana area. A fifth focus group was conducted in October 2013. This focus group consisted of 14 clients of the St. Joseph Hospital Diabetes Management Program and was conducted in Spanish.
Secondary Data
Office of Statewide Health Planning and Development (OSHPD) data from 2009 was used in defining the SJO service area.

Data from the 2010 US Census and estimates from the 2006-2010 American Community Survey (ACS) and 2005-2009 ACS were used to develop the Community Needs Indices and Intercity Hardship Indices.

Data from the 2012 American Community Survey / Demographic and Housing Estimates, was used to show the race/ethnic breakouts of the SJO service area. The 2013 Orange County Health Profile, Public Health Services, Orange County Health Care Agency, was used to show health differences among the three primary racial/ethnic groups of the SJH service area. Information on the API community was provided in a personal communication from the Executive Director of OCAPICA. An unpublished report prepared for MOMS Orange County by The Olin Group provided information about births in the SJO service area.

St. Joseph Hospital anticipates that implementation strategies may change and therefore, a flexible approach is best suited for the development of its response to the St. Joseph Hospital CHNA. For example, certain community health needs may become more pronounced and require changes to the initiatives identified by St. Joseph Hospital in the enclosed CB Plan/Implementation Strategy.

Identification and Selection of DUHN Communities
Communities with DUHN generally meet one of two criteria: either there is a high prevalence or severity for a particular health concern to be addressed by a program activity, or there is evidence that community residents are faced with multiple health problems and have limited access to timely, high quality health care.

Standard Language:
Communities with Disproportionate Unmet Health Needs (DUHN) are communities defined by zip codes and census tracts where there is a higher prevalence or severity for a particular health concern than the general population within our ministry service area.

The following table lists the DUHN communities/groups and identified community needs and assets.

PRIORITY COMMUNITY HEALTH NEEDS

The list below summarizes the prioritized community health needs identified through the FY14 Community Health Needs Assessment Process. Through the CHNA process, fifteen areas of concern were identified. The top eight concerns arose consistently across all avenues for community input - interviews, focus groups and community survey (note – the survey did not ask about access to green space and parks, but it was a high concern among community members in interviews and focus groups). The second list includes seven concerns that were mentioned through just one or two of the data gathering methods and thus appeared less frequently. The top eight are presented here in alphabetical order followed by the additional seven, also in alphabetical order:

Top Eight Concerns
1. Access to affordable, healthy food
2. Access to health care
3. Dental health
4. Diabetes
5. Lack of green space and parks
6. Mental health
7. Obesity
8. Substance abuse

Seven Additional Concerns:
9. Affordable and accessible transportation
10. Asthma in adults
11. Chronic Heart Disease
12. Cultural competency
13. Depression
14. Stress
15. Stroke
Needs Beyond the Hospital’s Service Program
No hospital facility can address all of the health needs present in its community. We are committed to continue our Mission through community benefit program and by funding other non-profits through our Care for the Program managed by St. Joseph Hospital.

Only applies to CA ministries
Furthermore, St. Joseph Health, St. Joseph Hospital will endorse local non-profit organization partners to apply for funding through the St. Joseph Health, Community Partnership Fund. Organizations that receive funding provide specific services, resources to meet the identified needs of underserved communities through St. Joseph Health communities.

The following community health needs identified in the ministry CHNA will not be addressed and an explanation is provided below:

Access to affordable, healthy foods: The Hospital does not directly address access to nutrition for the general public except for in the Meals on Wheels program for seniors and the disabled; however, we support and endorse grant applications to the St. Joseph Health Community Partnership Fund for several local central Orange County community based food banks seeking funding for sustainability. Without this funding, these organizations would not be able to sustain and/or further their work in this area.

Lack of green space and parks: The Hospital does not directly address green space and parks; however we support and endorse grant applications to the St. Joseph Health Community Partnership Fund-Community Building Initiative for local community based organizations who directly address these social and infrastructure issues. Without this funding, these organizations would not be able to sustain and/or further their work in this area.

Affordable and accessible transportation: The Hospital does not directly address transportation; however, when planning to provide services to underserved communities, we dedicate resources to our mobile clinics that strategically travel to locations, neighborhoods and communities with disproportionate unmet health needs. Our mobile units include dental, vision and health screening services.

Cultural competency: The Hospital provides cultural competency training for its employees; however, these trainings are not open to the public.

In addition, St. Joseph Hospital will collaborate with community partners that address aforementioned community needs, to coordinate care and referral and address these unmet needs.
COMMUNITY BENEFIT PLANNING PROCESS

Summary of Community Benefit Planning Process

The FY15-17 CB Plan was developed in response to findings from the FY14 Community Health Needs Assessment and is guided by the following five core principles:

- **Disproportionate Unmet Health-Related Needs:** Seek to accommodate the needs to communities with disproportionate unmet health-related needs.
- **Primary Prevention:** Address the underlying causes of persistent health problems.
- **Seamless Continuum of Care:** Emphasize evidence-based approaches by establishing operational between clinical services and community health improvement activities.
- **Build Community Capacity:** Target charitable resources to mobilize and build the capacity of existing community assets.
- **Collaborative Governance:** Engage diverse community stakeholders in the selection, design, implementation, and evaluation of program activities.

In March 2014, the Community Benefit Committee, a sub-committee of the SJO Board of Trustees participated in a “study session” to identify and prioritize community needs. The Committee used a ranking method tool to prioritize needs based on specified criteria provided. They used the criteria as well as a number ranking system (each Committee member received three points each) to rank the priority needs identified through the CHNA. The table below demonstrates the summarized rankings from all Committee members and the top three priority areas that resulted from the rankings.
Based on review of prioritized significant health needs and a thoughtful priority setting process, SJO will address the following priority areas as part of its FY15-17 CB Plan:

- **Access to Health Care**
- **Chronic Disease**
- **Mental Health**
**INSERT MINISTRY NAME**

**FY15 – FY17 Community Benefit Plan/Implementation Strategies and Evaluation Plan**

**FY16 Accomplishments**

SJO will monitor and evaluate strategies listed below for the purpose of tracking progress on the implementation of those strategies and document anticipated impact. Evaluation efforts to monitor each strategy will include the collection and documentation of strategy measures, number of partnerships made, percent improvement in health-related metrics, including behavioral and health outcomes as appropriate.

**Initiative (community need being addressed):** According to the Inner City Hardship Index, 364 of approximately 400 highest needs block groups are in the St. Joseph Hospital primary service area.

**Goal (anticipated impact):** Increase Access to Care for number of persons at 200% of Federal Poverty Level in central OC who lack appropriate health services.

**Key Community Partners:** Coalition of Orange County Health Centers, Family Resource Centers, CalOptima and St. Joseph Heritage Medical Group

**FY16 Accomplishments:** The measure to increase the number of new patients who selected SJO Community Clinics as their medical home was exceeded by 3% (57 patients). However, the strategy to increase the number of patients served was increased by 6%, but fell short from the target by 14% (880 patients) due to a number of unforeseen challenges. FY15 was a year of transition. The clinic became a Federally Qualified Health Center (FQHC) under an affiliation with St. Jude Neighborhood Health Center. Many of our medical patients who had MSI transitioned over to CalOptima and were auto assigned to different medical homes as a result the clinic lost approximately 370 patients in FY16 (FY15 6,913 pts served). The strategy to increase the availability of Specialty Care providers was successfully met. In FY16 SJO Community Clinics acquired 19 specialty groups with access to 125 specialty care providers. This was accomplished through a collaborative partnership with St. Joseph Heritage Medical Group as well as private physicians willing to see our patients at a discounted rate or for free.
Initiative (community need being addressed): Orange County Health Profile 2013 shows the following percentage of people reporting chronic disease diagnosis: 7.4% of adults with diabetes, 25.4% of adults with hypertension, 23.8% of adults are obese; 17% of deaths in the county were caused by heart disease, 6% of deaths in the county were caused by stroke.

Goal (anticipated impact): Improve Chronic Disease Management to optimize health outcomes for patients at La Amistad Family Health Center.

</tr>
</tbody>
</table>
Key Community Partners: Local American Diabetes Association (ADA) Chapter, Sister Ministry Clinics (St. Jude Family Health Center, Camino, SOS)

FY16 Accomplishments: Although the target was not met, data provided by new EHR system indicates there are fewer diabetic patients being treated. In addition to the loss of patients due to the CalOptima transition in FY15, an enhanced EHR system was implemented. Consequently, data tracking criteria differed from that of the previous system in Axeium. Touchworks, the new EHR system provides more sophisticated and accurate data. The variance is reflected in the result of the measure to improve clinical values of patients with chronic disease. At baseline there were 1,140 diabetic patients and in FY16 the number of diabetic patients was calculated at 893. We don’t believe that we lost 247 patients in one year as our patient schedules continue to be full. However, we believe that we weren’t able to completely filter out all unique patients with the previous EHR which could have resulted in counting some patients who received health screens twice. The strategy to decrease A1C by one percentage point in patients with uncontrolled diabetes was achieved. While the clinic diabetic population has improved in their overall management of the disease, it is important to point out that we need to establish a new baseline in order to accurately compare the data going forward. In FY15 during the transition of clinic patients from MSI to CalOptima, the Vision Mobile Clinic lost approximately 86 patients. Thus, patients obtained vision coverage through Vision Services Plan (VSP) and, we could no longer see those patients. However, in FY16 the Vision Mobile Clinic increased the number of patients seen by 46. Totaling the number of diabetic patients to 907, of those 679 (75%) received a diabetic eye exam. A 9% increase from FY15 but a 3% shortfall from the target.
**Initiative (community need being addressed):** FY14 CHNA qualitative and quantitative data show that mental/behavioral health is a significant health concern among communities in central Orange County.

**Goal (anticipated impact):** Increase the proportion of underserved population who receive Mental Health screening and resources in clinic setting.

</tbody>
</table>
Key Community Partners: Healthcare Agency of OC, Sister Ministry Clinics (St. Jude Neighborhood Health Center, Camino, SOS), Community based organizations

FY16 Accomplishments: Determined need for intervention to provide comprehensive mental health services to clinic patient population. St. Jude Medical Center, Mission Hospital, Hoag Hospital and St. Joseph Hospital have entered into a collaborative partnership to address the unmet need for behavioral health services for the most underserved population in Orange County. The regional psychiatry collaborative project is a pilot program that provides low income patients served by the ministries with medication management through a Psychiatrist as well as care coordination to ensure continuum of care through the community clinics. Assessment and counseling is provided at La Amistad, St. Jude, FRC Mission Viejo and Center for Healthy Living Costa Mesa or referred out to the new OC Health Care Agency Behavioral Health Services. The Psychiatrist and Care Coordinator travel to each site to provide medication management, evaluations in coordination with primary care sites. The Licensed Clinical Social Worker (LCSW) provides cognitive behavioral therapy to patients referred by clinic providers. Patients are also self-referred. Therapy/counseling is free and onsite 3 days a week.

2 Catholic Health Association-USA Community Benefit Content Categories, including Community Building.
3 CA SB697: “Vulnerable Populations” means any population that is exposed to medical or financial risk by virtue of being uninsured, underinsured, or eligible for Medicaid (referred to as Medi-Cal in California), Medicare, California Children’s Services Program, or county indigent programs. For SJH, we exclude Medicare as part of Community Benefit total and only include it below the line for SB697 reporting purposes.
4 Accounts for Hospital Fee. The pledge/grant (separate from the quality assurance fee) is reported in Cash and In-kind Contributions for other vulnerable populations.
5 Unpaid cost of Medicare is calculated using our cost accounting system. In IRS Form 990, Schedule H, we use the Medicare cost report.
SJO’s Executive and Management Team members lent their expertise, time and talent to outside organizations committed to delivering healthcare excellence and healthy communities.

The following lists all Board membership participation and volunteer work.

- Chair for the Southern California region of Hospital Association of Southern California
- Board of Trustees member for Taller San Jose Hope Builders
- Western University Advisory Board member and California State University, Fullerton Advisory Board member
- Orange County Health Care Agency Health Improvement Partnership member
- California Hospital Patient Safety Organization Board member
