

# Memory Scene

- ★ Using any found objects, create a little scene of a favorite memory about your special person. Place the scene in a special area or an unexpected location of your choice, where it will remain safe.
- ★ It may be helpful to think of a specific place or a specific moment that you would like to recreate. You can also create a scene of feelings. Discovering the objects to use is part of the process. Let your imagination lead the way!
- ★ If you want to share your memory scene you may want to think about adding music for it or write a story about it placing it near the scene itself; narrate the scene or leave it as its own story without words.
