

Patients Served

A cerebral vascular accident (commonly called a stroke) can happen to anyone at any age. In 2020, St. Luke's provided inpatient rehabilitation services to more than 534 patients who suffered from a stroke, with an average length of stay (LOS) of 15.2 days in the hospital.

At St. Luke's, stroke rehabilitation services are provided to patients by an experienced team of physicians, rehabilitation nurses, case management and therapy staff including physical, occupational, psychology, recreational, speech and other therapists. Our patients receive an average of **3.5 hours** of therapy per day.

Ages of patients in the Stroke program:

Age	Number of Patients
0 - 17	3 (0.6%)
18 - 40	23 (4.3%)
41 - 64	155 (29.0%)
65 - 74	143 (26.8%)
75+	210 (39.3%)

Outcomes

69.2 years old = average patient age

76.1% discharged to the community

90% of our patients were living in the community 90 days after discharge
